# FIRST RESPONDERS BRAVE, NEEDED, AND IN NEED.

Our team serves those who serve their communities. We take a data-driven, personnel-focused, and community-oriented approach.

## What We Do

---

PC3 uses communication and data to address the most pressing issues that our first responders are facing. With strong communication, you can shape the future of your organization, you can build bridges with the community, and create a new generation of recruits. We back everything we can with data proving or disproving the initiative's success. We believe data and communication are strongest when together and transparent.

## Who We Are

---

We are not a typical consulting agency. Our leadership is a paramedic firefighter with over 30 years of experience and 2 master's degrees and a data scientist with a decade of experience in big tech. PC3 is a network of paramedics, firefighters, and police officers, each with specific expertise. We assemble teams that meet our client's unique needs from this pool of talented individuals. Our mission is to help public service agencies cultivate and maintain strong teams that deliver solutions for their communities into the future.

### Workplace Scorecard

---

Track the department's vital statistics! This ongoing, data-driven approach lets you understand how our department is doing and and monitor improvement over time.

### Cultural Cultivation

---

We pull together a custom team to work with you one-on-one to help ensure implementation goes smoothly and facilitate challenging conversations.

### Strategic Planning

---

We can help you scale your organization, access more resources, and build relationships in the community so you can meet the challenges ahead.

### Workshops

---

Whether you're having tough conversations or redesigning your mission and vision, we can help guide you through the process.
